ISAACS MINI STORAGE / WALLA WALLA

Plan the gap between homes

A practical worksheet for a move, downsizing or a home project. Print both pages and keep this with your moving notes.

1 Write down the dates that matter

Old home: belongings must be out by

New home: keys / access confirmed for

Mover or vehicle booking: date and time

Storage: lease complete and access received

If the dates overlap badly, make a plan for where your belongings will stay. A reservation alone does not complete a rental or provide access.

2 Decide what actually needs space

- [ ] Separate belongings into move, store, donate, sell and dispose groups.
- [ ] Measure the largest pieces. Record length, width and height on page 2.
- [ ] Check door openings, loading access and the equipment your move will need.
- [ ] Keep medicines, important documents and essentials with you.
- [ ] Review your chosen facility's storage rules before loading the vehicle.

Measure before choosing space

Use the inventory below alongside a size guide. Floor area is useful for comparison, but it does not prove that a particular load will fit.

4 List your largest items and boxes

Item / group	Qty	Length	Width	Height	Access?

Write units beside measurements (feet or inches). Mark anything you need to reach during storage. Measure doorways separately; room dimensions are not door dimensions.

5 Compare the four sizes on our guide

6 x 4 ft
24 sq ft

5 x 6 ft
30 sq ft

10 x 14 ft
140 sq ft

10 x 20 ft
200 sq ft

Footprints use the same scale; dimensions are approximate. Diagrams show floor area only, not unit height, door clearance, safe stacking or guaranteed capacity.
